Details

Description

Sound tap connectors, hose couplings and hoses are the basis of effective watering. This is why Kärcher offers a complete series of accessories for connecting, decoupling and repairing watering systems, such as the robust G1 tap connector with G3/4 reduction piece. The reduction piece enables connection to two thread sizes. The universal hose connector can be used for all standard garden hoses and impresses with ergonomic design for simple handling. The perfect solution for connecting or repairing two hoses. The G1 tap connector with G3/4 reduction piece is particularly good for connection to Kärcher garden pumps and is compatible with the three most popular hose diameters and all available click systems.

Application

- For watering small to large areas and gardens
- For watering large gardens
- For watering food plants and useful plants (small beds, individual and potted plants)
- For watering ornamental plants (small beds, individual and potted plants)
- Cleaning gardening tools and garden furniture
